КАТАЛОГ

CLEARLine®
Be cool, be safe, be CLEARLine

COMPANY PROFILE

Biosigma S.p.A. has been a leading company in the production and distribution of disposable plastic items for biotechnology, research, clinical chemistry and pharmaceutical laboratories since 1988.

In our facilities of over 12,000 sqm, we have state-of-the-art injection machines and informatics tools that enable us to produce high-quality articles while remaining competitive on the global market.

Every customer can rely on a perfectly organized structure, certified by ISO 13485, OHSAS 45001 and ISO 14001, capable of adapting our biotechnology products and services to the continuous demands of the market. We offer our customers experience and professional expertise; customer satisfaction and product quality are always our main goals.

Our efforts in research and development allow us to offer an increasing and more advanced range of products in both Clinical Chemistry and Biotechnology fields.

Most of the products manufactured by Biosigma are classified as in vitro diagnostic medical devices and are therefore CE marked in compliance with current regulations.

Since August 2011 Biosigma has been part of the Dominique Dutscher Group, a leader in the distribution of consumables and equipment for the life science and biotechnology market. A catalogue of over 200,000 products and more than 140 brands such as Eppendorf, Thermo, Gilson, Nalgene Nunc.

CERTIFICATIONS

" Biosigma is always focused on the safety and the quality of its work reaching the most important certifications "

ISO 13485 Quality System Certificate demonstrates and promotes the company's commitment to organizational policies aimed at providing products and services in line with regulatory and market requirements related to the medical field.

ISO 14001 is a tool that will allow the organization to manage the environmental impacts of its activities in accordance with the applicable law, continuous improvement, from a pro-active attitude towards environmental issues.

The certification of the management system of health and safety in the workplace UNI ISO 45001:2018 is intended to provide security and tranquility that problems regarding the safety and health related to production processes are managed in a controlled way and that benefits in terms of safety are always monitored starting from the respect of conformity to mandatory legislation.

Registration Number: 3002945499

The production establishment and IVD Biosigma devices are registered with the FDA (Food and Drug Administration).

BIOSIGMA S.p.A. as a GREEN COMPANY

Enter the Biosigma's forest. Request your tree for free.
Scan the qrcode and redeem your tree.

Welcome to the Jungle.

Treedom is the first platform in the world that allows you to plant a tree from a distance and follow the story of the project online.

Since its foundation in 2010 in Florence, more than 3.000.000 trees have been planted in Africa, South America and Italy. All trees are planted directly by local farmers and bring environmental, social and financial benefits to their communities. Thanks to its business model, in 2014 Treedom became part of the Certified B Corporations, a network of companies that stand out for high environmental and social performance.

WE PREFER THE "GREEN"

OUR COMMITMENT TO SUSTAINABLE DEVELOPMENT AND ENVIRONMENTAL PROTECTION

Since 2010, in respect of the environment, the energy used in the Biosigma plants is self-produced from renewable sources or, for the remainder, purchased with a TUV Green Certificate. CLEARLine® products are manufactured in Italy with respect for the environment.

Since 2013 Biosigma has successfully obtained the UNI EN ISO 14001 environmental certification. Achieving a balance between environment, society and economy is considered essential to meet the needs of the present without compromising the ability of future generations to satisfy their own. That is why with the adoption of this standard, Biosigma aims to protect the environment by preventing or mitigating negative environmental impacts and to continuously improve its environmental performance.

CRYOWARE

BIOSIGMA OFFERS A COMPLETE LINE OF CRYOGENIC VIALS AND BOXES FOR STORING SPECIMENS AT TEMPERATURES AS LOW AS -196°C (VAPOR PHASE OF LIQUID NITROGEN).

BIOSIGMA CRYOGEN[®] TUBES ARE CERTIFIED FREE OF HUMAN DNA, DNase/RNase/ENDOTOXINS/ATP/PCR INHIBITORS, STERILE SAL 10^{-6} AND IATA PI 650. THEY HAVE A UNIQUE AND CONSECUTIVE 1D BARCODE PRINTED ON THE TUBES' BODIES.

THE LINE ALSO INCLUDES 2D CRYOGEN[®] TUBES, WHICH HAVE A 2D DATA MATRIX BARCODE ON THE TUBES' BOTTOMS IN ADDITION TO THE 1D LINEAR BARCODE.

CRYOGEN[®] VIALS CAN BE STORED IN BIOSIGMA CRYOGEN[®] BOXES, WITH 25, 81 OR 100 PLACES, WHICH HAVE A 1D LINEAR BARCODE PRINTED ON THE BOX SIDE OR 2D CRYOGEN[®] BOXES WHICH ALSO HAVE A 2D MATRIX BARCODE ON THE BOXES' BOTTOMS.

CRYOBOXES ARE MADE OF POLYCARBONATE TO WITHSTAND TEMPERATURES AS LOW AS -196°C (VAPOR PHASE OF LIQUID NITROGEN). THEY ARE AUTOCLAVABLE AT 120°C FOR 20 MINUTES.

THE RAW MATERIAL USED IS MEDICAL GRADE AND CERTIFIED USP CLASS VI, IN ACCORDANCE WITH UNITED STATES PHARMACOPEIA AND ISO 10993.

WARNING

DO NOT STORE CRYOGEN[®] TUBES IN LIQUID PHASE NITROGEN. INGRESS OF NITROGEN INTO THE TUBE CAN OCCUR BY CAUSING THE TUBE TO RUPTURE WHEN TAKEN OUT OF STORAGE. MAY CAUSE INJURY AND LOSS OF TUBE CONTENTS. WORKING TEMPERATURE: SUITABLE FOR STORAGE FROM GENERAL COLD STORAGE REFRIGERATION ($+4^{\circ}\text{C}$) DOWN TO THE VAPOR PHASE OF LIQUID NITROGEN.

1D CRYOLINE

CryoGen® Tubes / 1D linear barcode

- Human DNA, DNase, RNase, Endotoxins, ATP, PCR inhibitors free certified*
- Sterile SAL 10⁻⁶ *
- Certified IATA PI 650
- Working Temperature: suitable for storage from general cold storage refrigeration (+4°C) down to the vapor phase of liquid nitrogen
- Tubes in Polypropylene / Caps in Polyethylene and TPV

*

CLEARLine®
"Be cool, be safe, be CLEARLine"

Color coded inserts are available to fit both internal and external caps for quick sample identification

Star shaped top cavity is engineered for use with automatic decapping equipment

Innovative internal and external screw caps are produced from medical grade polyethylene (PE) and are co-molded with a thermoplastic elastomer (TPV) to provide a 100% leak-proof seal

Chemical resistant caps

Produced from medical grade raw materials that will not discolor after re-sterilizing

Slim profile external caps ensure better fit in standard racks and boxes

Standard code 128 barcode unique and unrepeatable on each vial includes human readable characters printed in both left and right hand orientation for easy readability by all users

Vials and caps are **autoclavable**

Printed graduations for accurate measurements

White writing surface for specimen identification

Chemical resistant polypropylene (PP) vial

Round bottom or **self standing**

Self-standing vials interlock in workstations

Our innovative screw caps **eliminate leakage and contamination**. Both internal and external screw caps are co-molded with a thermoplastic elastomer (TPV) layer and are 95kPa certified to provide a 100% leak-proof seal. This proprietary molding process eliminates the risk of contamination associated with brands that use separate o-rings.

Cryoboxes in polycarbonate

Boxes in polycarbonate for CryoGen® Tubes storage. Different models are available to accommodate either 25, 81 or 100 CryoGen® tubes. These durable cryogenic storage boxes are designed to be used at temperatures between -196°C and +121°C and are autoclavable at 120°C, for 20 minutes.

- For storing at temperatures as low as -196 °C (vapor phase of liquid nitrogen)
- Autoclavable at 121 °C for 20 minutes

- Numerical grid printed on the lid
- Frosted area on both lid and bottom for an easy writing
- Colored grid
- For storing at temperatures as low as -196 °C (vapor phase of liquid nitrogen)

- Autoclavable at 121 °C for 20 minutes
- Vial Picker: Removal of vials facilitated by a vial picker. Suitable for both internal and external Cryogen Tubes screw cap. Supplied with each pack of storage boxes
- In polycarbonate

MEDICAL
GRADE

Color coded inserts are available to fit both internal and external caps for quick sample identification

Innovative internal and external screw caps to provide a 100% leak-proof seal

Produced from medical grade raw materials that will not discolor after re-sterilizing

Printed graduations for accurate measurements

White writing surface for specimen identification

Datamatrix Code inserted in the bottom, sequential and corresponding to the "Code 128" on the tube body

The 2D code is automatically generated from the linear barcode during the manufacturing process Permanent laser etching system

Strict quality control, every tube is checked to ensure they meet our exacting standards of reading

The insert is secured in place by the use of ultrasound to weld it into place

Star shaped top cavity is engineered for use with automatic decapping equipment

Slim profile external caps ensure better fit in standard racks and boxes

Vials and caps are **autoclavable**

Standard code 128 barcode unique and unrepeatable on each vial includes human readable characters printed in both left and right hand orientation for easy readability by all users

Locking Base features prevents tubes rotating within the rack/workstation during capping and decapping.

The base of the tube is provided with **channels of evacuation** of the cryogenic liquid that could possibly be trapped between the base of the tube and the 2D pad.

CRYOPACKAGE

Automated solution on the market to eliminate the risks and complications associated with storing and retrieving samples in liquid nitrogen tanks, minimising the risks to operators.

SMARTFREEZER® EVO and SMARTFREEZER® EVO LAB meet the following requirements:

1. SECURITY AND MANAGEMENT SPEED
2. HUMAN ERROR ELIMINATION
3. REDUCTION OF OPERATING COSTS
4. REMOTE MANAGEMENT
5. FULL EVENT TRACEABILITY
6. ELIMINATION OF OPERATOR'S RISKS

SINGLE SCREW DECAPPERS for CryoGen® Tubes

Electronic Decapper/Recapper and Tube Picker

Versatile and easy to use tool specifically designed to decap and recap CryoGen® Tubes 2D barcode tubes and enable the user to individually pick and place tubes from CryoGen® Boxes 2D and ANSI/SLAS racks

FEATURES

- Rapid decapping and capping
- Very simple to use
- USB Battery charger
- Closing intensity adjustment
- Light weight

Package Contents

- Electronic Decapper/Recapper
- USB cable
- USB charger

CLEARLine® Accessories

CAT. NO.	Description	Internal packaging	Sale unit
BSM580481	Single screw decapper	1	1

Fully automatic capper / decapper for 48 places SBS ANSI/SLAS rack & 2ml CryoGen® Tubes

Digital automatic Decapper/Recapper

FEATURES

- Rapid decapping and capping
- Very simple to use
- Reduce risk of cross contamination
- Reduce risk of repetitive strain injury
- Recapping process ensures that tubes are tightly capped-no loose caps after operation

CLEARLine®
Accessories

The new Biosigma decapper provides a simple decapping and capping solution for CryoGen® Tubes 2D in a SBS ANSI/SLAS format rack 48 places. It offers a time saving solution that reduces the risks of repetitive strain injuries and potential sample cross contamination. Decapping and capping can be performed on 2ml CryoGen® Tubes.

Simple and Direct

Rather than using messy mechanical means the decapper digitally measures the force applied to cap each tube. This means it is quieter than other 48 well decappers and also does not have clutches that can wear out.

Easy to Use

With no extra unneeded controls, there are two buttons. One to cap and one to decap; the decapper recognises when a rack has caps and illuminates the decap button and vice versa.

Scanner 2D

DataPaq™ Cube Rack Reader

A compact, versatile, quick and robust scanner with minimal cabling. The DataPaq™ Cube Rack Reader is a 2D datamatrix tube camera reader with a scan & decode time of 1-2 seconds on a 'normal' computer.

The Cube can read all racks on the market including 2D Cryoboxes and SBS racks; even 384 racks.

The DataPaq™ Cube 2D scanner offers easy, out-of-the-box set up and is delivered pre-calibrated and ready to scan.

This instrument can scan all racks in the SBS format, regardless of the configuration or number of tubes, and by a quick and easy change of mask (included as standard) it can also scan all 2D Cryoboxes formats.

Our new automatic rack type detection feature means that you no longer have to configure the Cube for all rack types. Simply place your rack on the scanning window and the software will work out what type of rack it is and run the scan - easy!

Free DataPaq™ software upgrades for life.

DataPaq™ Cube

- Compatible with 24, 48, 96, 240, 384 SBS racks
- Compatible with 81 and 100 2D Cryoboxes
- Smallest 'scan all' scanner on the market
- Camera based instrument resulting in rapid imaging and decoding
- Footprint ideal for benchtop and integration
- Minimal cabling
- All the exported information can be integrated into systems such as: Oracle, SQL, MySQL, Postgres, HSQL and many others.
- DataPaq™ software displays the results of the scan

A sample management system optimised for your laboratory's needs

- Samples is a laboratory sample management tool designed to keep your sample storage inventory organised.
- Samples software includes a host of features designed to streamline your sample storage workflows and makes adding and searching sample information quick and simple.
- Its intuitive import tools allow integration with existing sample databases, while its range of sample entry options and fully editable set-up parameters means the system can be optimised for your laboratory or storage facility.
- We can even add custom features, developed by our programmers to your specifications, to ensure Samples provides the exact solution for your inventory management requirements.

Inventory View and Container View

Save and customise multi-parameter searches

EASY DATA INPUT

In addition to manual entry of individual samples using the intuitive user interface, Samples lets you easily import sample data from existing records in Excel spreadsheet or text file format. Our Import Wizard ensures your imported data is compatible, meaning adding legacy data couldn't be simpler. You can scan in samples quickly and easily using Ziath's DataPac™ barcode readers, and efficiently register any changes to your 2D storage racks and boxes.

CUSTOM DESCRIPTORS

Samples' customisable Tracking Tags and Sample Types allow you to associate fully-searchable data with your samples. Create an unlimited number of Tracking Tags to describe your samples using a variety of descriptor formats including free text, quantities, dates and even links to documents such as safety or regulatory datasheets. Our Sample Types labelling feature allows differentiation between, for example, samples in multiple laboratories, and each Sample Type can have its own set of Tracking Tags.

POWERFUL SEARCHING

Samples lets you easily switch between viewing graphical displays of container layouts or a list of all containers and samples. Our multi-parameter search tool allows you to combine search terms to locate specific samples using Tracking Tags and Sample Type entries, keywords, location or date records. You can even save regularly-used searches and customise them for future use. And with our archive function, you will never lose access to historical data, even when a container has been permanently removed from storage.

CENTRIFUGE TUBES

WE OFFER A WIDE RANGE OF CENTRIFUGE TUBES WITH SCREW CAPS OR SNAP CAPS, MADE OF HIGH TRANSPARENCY AND MEDICAL GRADE RAW MATERIALS. THEY ARE SUITABLE FOR VARIOUS APPLICATIONS IN MOLECULAR BIOLOGY, RESEARCH AND CLINICAL CHEMISTRY. THEY CAN BE USED FOR DIFFERENT APPLICATIONS.

CENTRIFUGE TUBES

The best protection for your samples!

Operators are constantly searching for consumables that fit their needs and allow to achieve best results in life science laboratories.

Biosigma offers the right solution with a complete line of high-quality products, tested and certified.

The raw materials without additives ensure the best performance in terms of yield and minimize the risk of interference.

We offer microtubes with snap caps, safety lock caps or screw caps to prevent sample loss during preparation and long-term storage in clinical chemistry, biochemistry and molecular biology.

The safety lock cap provides extra security for radioactive and biohazard samples and reduces sample loss during processing steps.

CENTRIFUGE TUBES

Microtubes 0.5, 1.5 and 2.0 ml CLEARLock™ CLEARLine®

CLEARLock™

CLEARLock™ microtubes offer the security of a screw cap tube and the convenience of a snap cap tube. They provide supreme protection to your samples by ensuring superior security during centrifugation and precise sealing to prevent evaporation, which are essential features for lab procedures.

CLEARLock™ microtubes have been specially designed and tested to withstand up to 30,000 xg during centrifugation without any rupture and to preserve the sample integrity. The hinged lid prevents any accidental opening during use, especially when working with hazardous/precious samples or incubation. The precise sealing also prevents evaporation during long-term storage.

Each production batch is free of human DNA, DNase, RNase, Endotoxins, ATP, PCR inhibitors and certified by our internal laboratory.

- Hinged lid prevents any unintentional opening during use
- Precise lid sealing avoids evaporation during long-term storage
- Pierceable writing cap
- Graduated with writing area
- Optimal transparency
- Centrifugation up to 30,000 x g
- Temperature range: -80°C + 100°C
- Autoclavable at +121°C for 20 minutes
- Zip bags, re-closable
- Particularly suitable for application in PCR and other applications in molecular biology
- In Polypropylene Medical Grade, Non Cytotoxic – Non Hemolytic
- Recommended for chemical and biological sample storage
- Human DNA, DNase, RNase, Endotoxin, ATP, PCR inhibitors free certified*

CENTRIFUGE TUBES

Microtubes 5.0 ml CLEARLock™ CLEARLine®

5 ML CLEAR LOCK™ microtubes are designed for samples too large for standard microcentrifuge tubes (1.5ml or 2.0ml) but in the meantime too small for 15 ml centrifuge tube. They ensure a contamination-free pipetting and they are the best choice when working with medium-sized sample volumes. In many applications it may replace the 15 ml test tubes, reducing the waste plastic, storage space needed and transport costs.

Secure locking system with audible closing click an additional guarantee during lab procedures.

CLEARLine® guaranteed purity. Tests and certificates are performed by an external independent laboratory, available on request.

Centrifugable up to 21,000 x g
Temperature of use: -80°C + 100°C
Autoclavable open at +121°C for 20 minutes

Same diameter and conical bottom shape as a 15 mL conical tube allow use in existing centrifuge rotors, adapter and racks.

Easy-to-open cap reduces operator's hand fatigue preserving the sample integrity. Pierceable writing cap.

Graduated with writing area.

Made from highly transparent, chemical resistant **Medical Grade polypropylene** for easy visibility of pellets.
Non Cytotoxic - Non Hemolytic

It may be used in all applications that require heating.
 Use the tube clips at temperature above 80°C to prevent cap opening and consequent sample loss.

CENTRIFUGE TUBES

CLEARLine® CENTRIFUGE TUBES

CLEARLine centrifuge tubes are applicable in molecular biology as disposable laboratory consumables which are manufactured from high transparency polypropylene. Two types of volume are available to meet general need: 15 ml and 50 ml. A ring molded on inner surface of cap make an excellent seal to prevent leak of liquid. Marking area is printed in white to make tube easy for identification. Clearly graduation in black on the surface is helpful for users to calibrate. Preferably, 3 ml graduation molded on conical bottom improves the accuracy of centrifuge tube.

All CLEARLine centrifuge tubes are packaged in bags or racks with sterilization, RNase-free, DNase-free and Non-pyrogenic.

- 15ml and 50ml volume
- High transparency polypropylene
- Molded ring in the cap inner surface grants an excellent seal to prevent leak of liquid
- White writing area for easy identification
- Black graduation
- Conical and self-standing bottom
- Can be centrifuged up to 14,800 x g for 50 ml and 10,280 x g for 15 ml centrifuge tubes
- Sterilised at gamma rays SAL 10⁻⁶
- RNase-free, DNase-free and Non-pyrogenic
- Autoclavable at 121 °C during 20 min.

CLEARLine®
"Be cool, be safe, be CLEARLine"

Packaging information:

- Lot number is printed on packaging for tracking
- Heat-sealed bag, reusable zip bag
- PS rack, heat shrinking pack

CENTRIFUGE TUBES

Low Binding Microtubes 0.5, 1.5 and 2.0 ml CLEARLock™ CLEARLine®

Low Binding CLEARLine®

"Be cool, be safe, be CLEARLine"

Minimize sample loss!

Low Binding Microtubes CLEARLock™ CLEARLine®

Sample loss during handling is a critical issue for the success of the analysis, especially when volumes are small, concentrations are low or processing steps are extensive.

To prevent potential interactions between analytes and tubes, Biosigma has created the new Low Binding CLEARLock™ CLEARLine® Microtubes line.

The new Microtubes are designed to minimize protein and nucleic acid loss without using any surface coating such as silicone. Biosigma Low-bind material ensures optimal sample recovery and reproducible results, reducing the risk of interference with the samples.

The Low Binding Protein and DNA Microtubes are ideal for both sample preparation and long-term storage, especially for low concentration samples that require minimal protein and DNA loss.

Each batch is certified free from human DNA, DNase, RNase, ATP, endotoxins, and PCR inhibitors.

MAIN CHARACTERISTICS:

- Maximum Nucleic Acid and Protein recovery rates
- Hinged lid prevents any unintentional opening during use
- Precise lid sealing avoids evaporation during long-term storage
- Pierceable writing cap
- Graduated with writing area
- Optimal transparency
- Centrifugation up to 30,000 x g
- Temperature range: -80°C + 100°C

Protein recovery with Low Binding Protein Microtubes CLEARLock™ CLEARLine® compared with other suppliers.

Test procedure:

- Low Binding protein CLEARLock™ CLEARLine® Microtubes from Biosigma, suppliers 1 and 2 (Low binding and standard) were filled with an aqueous BSA solution and human protein extracts in a concentration of 40ng/ml and stored at 4°C for 24hrs.
- After the incubation, proteins were extracted, concentration determined by Bradford assay, values normalized for Biosigma Microtubes recovery and used to generate the following graphic.
- 3 independent experiments were performed.
- Average recovery >20% compared to standard tubes.

CENTRIFUGE TUBES

The best protection for your samples!

Microcentrifuge tubes with screw cap CLEARLine® are made of medical grade raw materials that do not discolor after re-sterilizing.

The raw materials are certified USP Class VI, in accordance with United States Pharmacopeia and ISO 10993.

The tubes are non-cytotoxic, non-hemolytic, heavy metals free and free of ingredients of animal origin.

The tube is made of medical polypropylene and the cap is made of medical polyethylene.

The combination of polyethylene cap and polypropylene tube facilitates screwing and avoids the grip effect caused by using the same raw material for both components.

The tubes have an engraved writing surface and graduation.

There are 3 styles of caps to choose from and 6 sizes of conical bottom or self-standing tubes (0.5, 1.5 and 2ml). The caps are also available in different colors for easy sample identification.

Microcentrifuge tubes with screw cap CLEARLine® are certified as STERILE by a validated method that provides a Sterility Assurance Level (SAL) of 10^{-6} . You can download the lot-specific certificate from the certificate section on the website.

Microcentrifuge tubes with screw cap CLEARLine® are certified free of DNase, RNase and Endotoxins by our internal laboratory. You can download the lot-specific certificate from the certificate section on the website.

- **3 styles of caps to choose from and 6 sizes of conical bottom or self-standing tubes (0.5, 1.5 and 2ml)**
- **Withstand high speed centrifugation up to 16,400 rpm or 25,000xg and temperatures from -85°C to +121°C**
- **Autoclavable to 121°C. for 20 minutes**
- **Tubes made in medical polypropylene and cap in medical polyethylene**
- **Sterile SAL 10^{-6}**
- **Certified DNase/RNase/Endotoxins free to satisfy the highest demands in several biotechnological applications**

New Biosigma CLEARLine® STERILE FILTER TIPS, RACKED

UNIVERSAL FILTER TIPS IN RACK, in PP Sterile, Low Retention.
DNase & RNase free, Pyrogen free - CLEARLine®

FEATURES

- New CLEARLine® packaging
- QR code in the label that simplifies tracking of lot number and expiry date
- Filtered tip, in natural polypropylene
- Sterile
- Autoclavable at +121°C
- Standard and low retention
- DNase & RNase free, Pyrogen free
- Racked, hinged lid
- Compatible with most micropipettes on the market
- Environmentally Green friendly packaging

FILTER TIPS

STERILE FILTER TIPS, RACKED, IN LIFT-OFF LID BOXES

Your solution for liquid samples.

- Filtered tip, in natural polypropylene, racked, available in lift-off lid boxes
- Certified DNase, RNase-free, human DNA, PCR inhibitors and Pyrogen free
- Sterile
- The ISO 8655 norm, as established by an independent laboratory,
- Autoclavable at 121°C
- Supplied in a rack with removable lid, for under hood use

Available:

- In standard virgin polypropylene
- In low Binding: the tip, hydrophobic PP made, reduces the surface tension with two benefits: a maximal sample refund and a minimal retention of DNA and proteins (weakest retention respect to the standard one)

Certification ISO-8655

Recharge system for ClearLine® hinged racks

- Simple and fast refill system
- Standard or low-retention, non-sterile, filterless tips with universal compatibility
- Environmentally friendly: cardboard packaging (reducing plastic waste associated with refill tower packaging)
- Very compact: the system requires 57% less storage space compared to other systems
- ClearLine® Prime refill trays are compatible with ClearLine® Prime hinged racks with filter tips
- Available in resealable Cleanpack bags

SEROLOGICAL PIPETTES

CLEARLine® SEROLOGICAL PIPETTES

Serological pipette of 1 ml, 2 ml, 5 ml, 10 ml, 25 ml, 50 ml and 100 ml designed to be used with electromotion pipette controller and manual pipette pump to transfer liquid in various volume for laboratory use.

- Seven types of volume 1, 2, 5, 10, 25, 50 and 100 ml
- Bidirectional graduation and negative graduation improve the accuracy
- Color code on tips make pipettes easily recognizable
- Sterile at gamma rays 10^{-6}
- Packaged in bags
- Bulk packaging and individually packaging in plastic/paper wrapper
- RNase-free, DNase-free and Non-pyrogenic
- Graduation calibrated, certificate available on request

Packaging information

Lot number printed on packaging for tracking

- Plastic/paper wrapper easy to open
